AB-1102+L025+L046+VB-0014+RL-8003

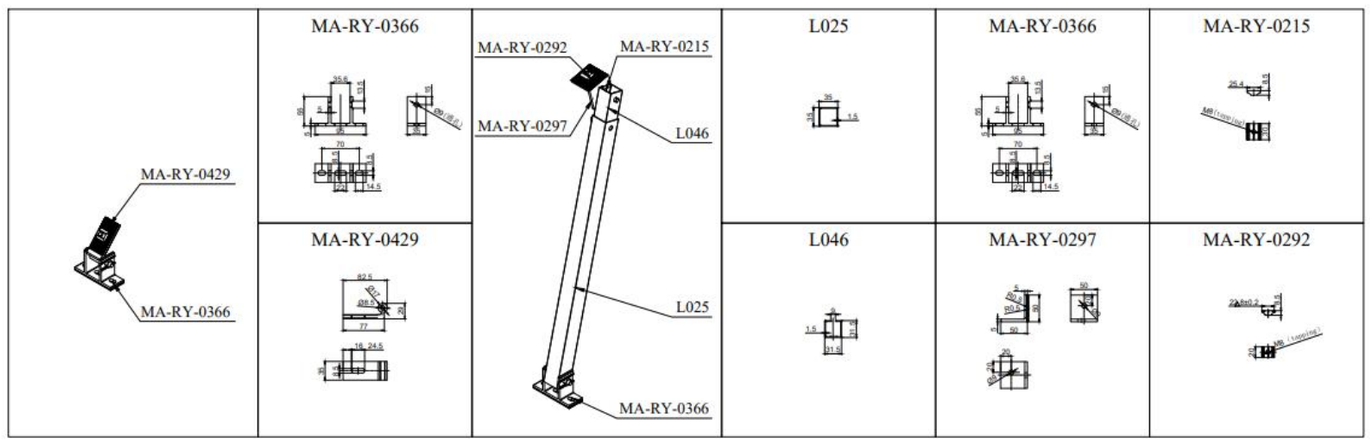

Adjustable feet are used to support and level solar rails on metal roofs, compensating for surface irregularities and ensuring uniform height across the mounting system. They are widely used in residential and commercial photovoltaic projects with various metal roof types.

Application	Pitched Rooftop
Key Features	Height Adjustable – Allows on-site adjustment to accommodate uneven metal roof surfaces and optimize rail alignment. Corrosion-Resistant – Made from aluminium or stainless steel for long-term outdoor durability.
Specification	Anodizing treatment 10μm
Material	AL6005-T6& SUS304
Color	Silver
Warranty	10 years and 25 years service life

High Load Capacity

Provides strong and stable support for the entire solar array.

Versatile Compatibility

Suitable for various rail profiles and metal roof types.
