POWERCO

CE-8056

Used to secure the first and last solar panels to the rail at the edges of the array. Commonly applied in rooftop and ground-mounted systems for panel edge retention.

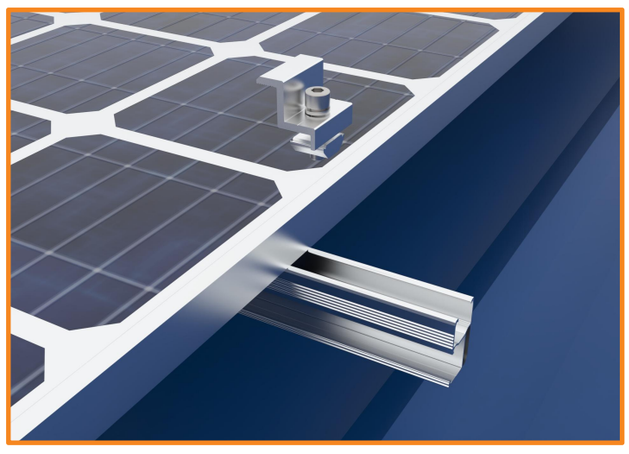

Application	Edge panel fixing
Key Features	Secure Edge Fixing – Firmly locks the first and last panels to the rail, preventing movement. Pre-assembled Design – Integrated components reduce parts handling and speed up installation. One-Bolt Fastening – Simple single-bolt tightening saves time and tools.
Dimensions	50mm
Specification	Anodizing treatment 10μm
Material	AL6005-T6& SUS304
Color	Silver
Warranty	10 years and 25 years service life

Material:AL6005-T5&SUS304

Precise Alignment
Ensures accurate panel positioning for a straight, uniform array.

Wide Compatibility
Suitable for 30mm and 35mm panel frames, covering most common module thicknesses.
