RF-0286+FA-0001

250mm mini rails, designed specifically for Metal Roof installation. The rails are pre-drilled for direct use with self-tapping screws. Pre-installed rubber matting forms a waterproof seal, effectively preventing rainwater from seeping into the roof and protecting the structure.

Application	Pitched Rooftop
Key Features	Pre-drilled Holes – Ready for self-tapping screws; no on-site drilling required. Integrated Rubber Seal – Pre-installed sealing strip provides waterproofing at each fixing point. Compact 250mm Length – Suitable for tight spaces and smaller panel layouts.
Dimensions	250mm
Specification	Anodizing treatment 10μm
Material	AL6005-T6& SUS304
Color	Silver
Warranty	10 years and 25 years service life

Quick Installation

Lightweight design with pre-assembled components speeds up mounting.

Durable Material

Corrosion-resistant aluminium for long-term outdoor performance.
