POWERCO

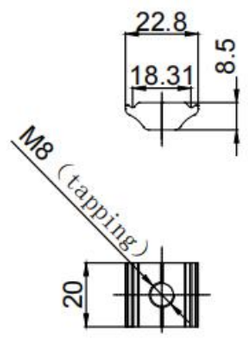

FA-M8-0023

Designed to rapidly secure photovoltaic modules or mounting accessories within mounting rail channels, this is a common fastener in PV mounting systems. Suitable for various roof and ground-mounted PV structures, it offers ease of use and effectively enhances both installation efficiency and system stability.

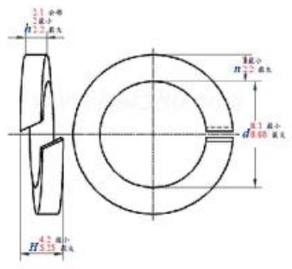

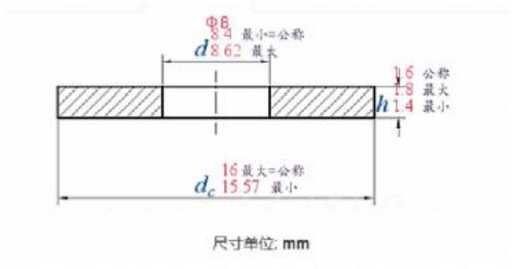

Application	Fastener
Key Features	Secure Rail Engagement – Locks firmly into rail channels for strong and stable connections. Versatile Use – Compatible with various clamps, connectors, and brackets.
Dimensions	M8*25
Specification	Anodizing treatment 10μm
Material	SUS304
Color	Silver
Warranty	10 years and 25 years service life

M8X25

Reliable Load Transfer
Securely holds components under both static and dynamic loads.

Corrosion-Resistant
Made from stainless with durable coating for long-term outdoor performance.
